

BOMU HOSPITAL

Health • Hope • Humanity

ANNUAL REPORT

JAN TO DEC 2019

Bomu Hospital is a not for profit registered and recognized non-governmental healthcare organization. It is a project of Mkomani Clinic Society (MCS), an entity that came into existence in the late 70's when a group of citizens who were conscious of the dire lack of accessible, affordable health care services for the poor and destitute, got together and established a small outpatient facility in the Mkomani area of Mombasa Kenya. In the last 40 years, the Society has grown, and so has its activities. Today, MCS operates the Bomu Hospital, its flagship institution that is located in Changamwe, close to the Moi International Airport. The facility has several health care programs that cater to the health care needs of the poor, malnourished and the HIV affected and afflicted.

Bomu Hospital supports six orphanages with food ration on a weekly basis. Through donors, we were able to donate scholastic material to the below orphanage.

Dr. Kaliti, a fistula surgeon, conducted a training session with health care workers from Kilifi, Kwale and Mombasa Counties on how to screen for fistula. The free screening and treatment week took place from 21st to 26th January 2019 at the main hospital.

A Peer Educators training was organized at Bomu Hospital. The training took place over three days of which the last day involved out-door activities at an external venue.

We believe in quality care as a core value and this comes with highly trained personnel. Below is a three-day training on case management organized by the hospital.

Participants enjoying at Wild Waters

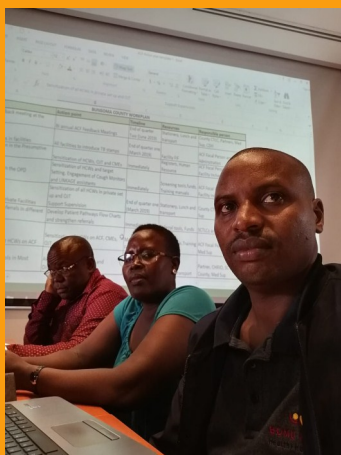

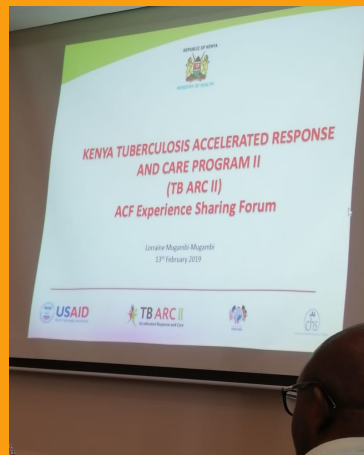

We continuously strive to partner with stakeholders in provision of services or commodities to improve access to health and health commodities.

Below is our facility manager, Bomu Likoni, donating condoms to Kenya Ferry Services.

Our team from Bomu Likoni represented Mombasa County in a seminar held in Nakuru to share experiences in active TB case finding.

On 17th February 2019, we partnered with Lions Club of Mombasa Pwani to conduct a free eye medical camp that took place at the main hospital in Changamwe. Over 400 patients were screened and several of them got prescriptions glasses at a subsidized rate.

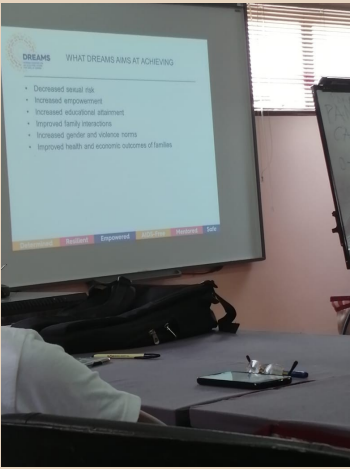

Several patients were referred to Lions Eye Hospital to receive cataract surgery. Above picture shows the patients post-op.

DREAMS is a new program targeting adolescents and young girls who are HIV negative. The program aims to equip them with skills and knowledge to maintain an HIV free lifestyle.

Below is a sensitization meeting to introduce health care workers on the program.

Bomu Hospital partners with the Sunni Muslim Association to provide free circumcision services at a medical camp organized in Shimoni.

The camp took place over three days. 300 children were attended to and 68 boys were circumcised.

Pre-Exposure Prophylaxis (PrEP) targets HIV negative individuals who are exposed to high risk activities. The activities of this program are monitored by the sub-county.

Below is a supportive supervision meeting held at Bomu Medical Centre Mariakani.

In early 2019, Bomu Hospital acquired an independent site in Tudor for archiving medical records.

The site was officially opened by the Executive Director, Mrs. Anjarwalla, in February 2019.

The Executive Director addressing staff during a general staff meeting.

Nursing students from Norway completed their attachment period at Bomu Hospital, Changamwe. They rotated through various departments over a period of three months.

Below is an orientation program conducted by the Human Resource Manager whereby the students were taken through the mission, vision and core values of Bomu Hospital.

24th March marks the World TB day. Every year, Bomu Hospital partners with the Ministry of Health and the sub-county to participate in the World TB Day procession.

We also supported the activity through provision of tents and chairs at the venue.

In March 2019, visitors from various US State government agencies visited Bomu Medical Centre Al Walidayn. The group was taken through the various service delivery points with staff members explaining the services offered.

Data Quality Analysis (DQA) is a regularly conducted activity at Bomu Hospital and its affiliated sites. Regular DQAs provides invaluable information to the senior management to be able to make decisions to continuously improve services at the facility.

Below is a feedback meeting following a DQA exercise conducted at Bomu Medical Centre Likoni.

Similar to the eye camp organized at the main Hospital, we also arranged for the same to take place at Bomu Medical Centre Likoni.

This enabled us to reach our patients who could not make it to the main hospital.

Bomu Hospital had the pleasure of hosting the U.S Ambassador to Kenya, H. E. Amb. Kyle McCarter, on Thursday 20th June, 2019. The Ambassador took a tour of the facility and was highly impressed with the hard work and dedication shown by staff and the quality of services offered at Bomu.

The Ambassador with the Chief Executive Officer on a tour of the facility.

The International Day Against Drug Abuse was marked on 26th June 2019. Once again, we partnered with the sub-county to provide tents and drinking water for the participants.

On 4th August 2019, Bomu Hospital collaborated with the Lions Club of Mombasa Pwani to conduct a free eye medical camp that was held at the main hospital.

Patients received free eye check-ups and prescriptions glasses at subsidized rates.

Our trademark event, Youth Fun Day, was conducted on 30th August 2019 at the main hospital. Hundreds of children enjoyed a fun day filled with activities.

Below is a pictorial of activities that took place during the Youth Fun Day.

Our support towards orphanages continued in 2019. Below is a donation of food ration to an orphanage .

This year, the World AIDS Day was marked with a procession which began from Bomu Hospital and ended at Bomu primary school.

Below is a pictorial of the World AIDS Day 2019.

Our quality policy outlines providing quality health services at accessible sites. Keeping this in mind, we are proud to set foot in Mombasa Island with our first clinic opening doors to the public on 16th December 2019.

The clinic provides full outpatient services with a state-of-art laboratory and fully-stocked pharmacy.

The clinic operates from Monday to Friday 9:00 a.m. to 6:00 p.m. and 9:00 a.m. to 1:30 p.m. on Saturday.
